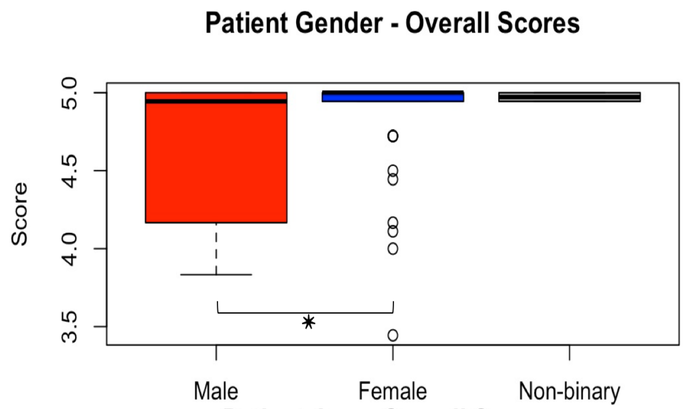
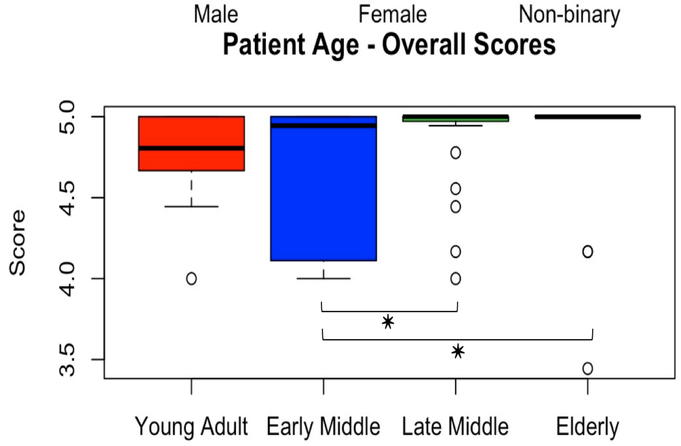
Getting the opinion that matters: A comparison of a quantitative measure of patient feedback on surgical trainees' communication skills.

THE UNIVERSITY OF TOLEDO

Gender and Age Influence Perceived Communication





- Female and older patients rate male residents higher in communication effectiveness than younger, male patients

No Significant Racial Influence on Communication Ratings

Patient and Resident Demographics

		Patient	Resident
Gender	Male	29	9
	Female	50	0
	Non-binary	2	0
Race	White	65	8
	Black	6	0
	Hispanic	2	0
	Other	3	1
	Declined to Answer	5	0
Age	Young Adult (18-35)	13	
	Early Middle Age (36-50)	19	
	Late Middle Age (51-65)	28	
	Elderly (66-85)	20	
	Declined to Answer	1	
Resident Year	PGY-1		2
	PGY-2		2
	PGY-3		2
	PGY-4		1
	PGY-5		2
Insurance	Government	33	
	Private	35	
	Uninsured	4	
	Government and Private	3	
	Declined to Answer	6	

- Observed differences in racial variations did not reach statistical significance

Recommendations for Improving Communication

ACGME

- Integration of direct patient feedback into residency curricula
- Bias awareness training
